DETAILED ACTION

Allowable Subject Matter

1. Claims 1-14 are allowed.
2. The following is an examiner's statement of reasons for allowance: As set forth on page 3 of the prior Office action mailed May 5, 2004, no prior art has been found to disclose or suggest applicant's PWM correspondence table associating a PWM tone value to a corresponding laser pulse pattern, wherein said PWM tone value, when regarded as a bit sequence, comprises a first bit region having a value determined depending only on a difference value between an input tone value and a threshold value, and a second bit region having a value determined depending only on a value represented by said threshold value excluding four or five bits thereof, as recited in base claim 1. Newly added base claim 11 recited a similar limitation, and is thus allowable for similar reasons. As for base claim 4, no prior art has been found to disclose or suggest said PWM tone value, "wherein said PWM tone value (p), before being added with said address offset value (p0), depends on a difference ($\Delta n = n_i - n_c$) between said tone value (n_i) of said input pixel and said threshold value (n_c), and said address offset value (p0) to be added to said PWM tone value (p) is a value which is switched on the basis of a comparison of said threshold value (n_c) with said threshold value (Θ), or a comparison of said tone value (n_i) of said input pixel with said threshold value (Θ)."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
